

Investment objective

The objective of this Fund is to provide its investors with long term capital growth, principally by means of investments at all times for at least 75% of the Fund's assets in equities or similar instruments issued by companies based in a member state of the European Monetary Union (EMU). It can also be exposed up to 10% to equities issued by companies having their registered office in other European countries, or having a predominant proportion of their assets or interests in Europe, or operating predominantly in or from this geographical area. The Fund is actively managed and the Sub-Manager's discretionary powers are not constrained by the index. Although the Sub-Manager may take into consideration the index composition, the Fund may bear little resemblance to the index. In order to achieve its investment objective, the Fund will base its investments on fundamental research in the selection of individual securities for long positions. The allocation will be reviewed frequently in light of discussions the Sub-Manager may have with the management of companies in which it invests or is considering for investment.

Highlights

-The Euro Select Fund (I EUR share class) was up 0.3% in June, as compared to its benchmark which declined by -0.7% Key contributors included Pfisterer, STMicro, and Trigano, while Renault, Teleperformance, and Sanofi weighed on performance Information Technology, Industrials and Energy provided the strongest support, whereas Consumer staples, Consumer Discretionary, and Healthcare were detractors

Market Review

Equity markets stabilized in June after the strong performance since April, amidst generally resilient European macro data. In this context, cyclicals - such as Industrials and Semiconductors - significantly outperformed defensives - such as Consumer staples and Healthcare. Small and mid caps continued to outperform large caps.

Fund Review

In June, the Euro Select Fund (I EUR share class) was up 0.3%, as compared to its benchmark which declined by -0.7%. Best contributors were Information Technology and Industrials sectors, while Consumer staples and Healthcare were a headwind. Pfisterer, the recent German IPO, was our top performer helped by the renewed excitement around the “electrification” theme, broker initiations, and great Q1 orders intake (+35% yoy). STMicro performed well after positive messaging from the CEO about Q2 at a broker conference, the long de-stocking cycle they faced seems to be over. Trigano outperformed after Q3 sales indicated a strong underlying market, they confirmed the voluntary inventory de-stocking has come to an end, and the orderbook is growing double digits for next year. Among detractors, Renault, French car maker, underperformed after its CEO announced he would leave to join Kering. We exited Renault as we think our original thesis of closing the SOP discount is now less likely given both the well-regarded CEO & CFO have left. It is not a given that the new management will be able to pursue this strategy. Teleperformance underperformed after the CMD, despite announcing a return to MSD topline growth by 2028. The stock remains an “AI loser” in the eyes of the market despite growing topline (+2-4% in 25’) and earnings, it trades on 20% FCF yield 25’. During the month we also exited Commerzbank.

Outlook

We are still pleased to note that mid-caps, to which the Fund has considerable exposure, outperformed large caps for a fourth month in June. Yet, their relative valuation appeal remains high. We think our focus on a “Darwinian” approach to portfolio construction, where stock selection is driven by the highest risk/rewards, has led to a well-diversified portfolio with attractive valuations. Other than for its intended mid-caps bias, the portfolio has close to neutral factor exposures.
