Investment objective

The objective of this Fund is to provide investors with an absolute return which has limited correlation with the trend of the main stocks or bonds markets indices by investing mainly in UCITS, UCITS eligible exchange traded funds, money market funds and/or other UCIs. The weighting between these instruments will be determined by the Manager according to its personal assessment of the market trends. The Fund may provide indirect exposure across asset classes, mainly to equities and fixed income markets but also to currencies and money market instruments globally, including emerging markets. The Fund may also be exposed to commodities, including gold and precious metals. This exposure shall only be achieved by means of eligible instruments and shall be limited to a maximum of 10% of the Fund's net assets. To allocate the exposure on the various categories of asset classes and build up a global conservative portfolio, the Manager uses, in particular, macro-economic cycle analysis, asset valuation and risk and correlation analysis. Fundamental top-down analysis will evolve through time. It may include paying attention to, without being limited to, global yield curves, markets valuations, profits cycle analysis, earnings expectations, credit spreads, investor sentiment and other factors. The Fund is subject to ongoing monitoring to ensure that risk parameters and market exposures consistent with investment views are maintained. The Fund may also invest in exchange traded financial derivative instruments (including options and futures) in order to manage its portfolio efficiently and to protect its assets and liabilities. **The Fund is actively managed not in reference to a benchmark.**

Market Review

Risk assets continued their strong momentum in October, with sentiment aided by the U.S. Federal Reserve cutting interest rates and continued positive momentum surrounding all things regarding artificial intelligence. With rate cuts fuelling investor optimism U.S. Equities (S&P 500 TR) returned 2.3% in October, continuing to set new record highs along the way. Global equities (MSCI ACWI NTR USD Index) up a similar amount, helped by strong returns in Emerging Markets (MSCI Emerging NTR USD Index) which produced returns of 4.2% during the month. Fixed Income markets were also positive, with U.S. yields falling as the Federal Reserve continued its interest rate cutting cycle. The Bloomberg U.S. Aggregate bond index was up 0.6% and the Bloomberg Global Aggregate Bond Index Hedged to USD was up 0.8%.

Fund Review

The 'I' USD share class of the fund returned +1.2% in USD terms in October, with the majority of assets contributing to the positive returns. On a year-to-date basis the fund is now up 10.2% in USD terms. Equity markets were mixed on the month, with Artificial Intelligence driving U.S. market returns. Our developed market holdings up between -2.1% and +1.5% on the month. Our holdings in EM ex China equities were again a notable contributor, producing returns of 7.1% in October. Fixed income returns were driven by falling interest rates, while credit spreads widened slightly on the month. As a result, our investment grade holdings were all positive 0.3%-0.4% on the month, whereas our high yield holdings fell just over 0.1%. Our liquid alternatives holdings were the largest gainers on the month, led by our managed futures holdings up 3.8%. Gold's record-breaking rally reversed after hitting all-time highs of \$4365/oz, however the precious metal still closed October with a 3.8% gain. During the month we trimmed our gold holdings several times to lock in profits from the rally; however, our overall asset allocation remains unchanged at 53% Bonds & cash, 26.7% Equities and 20.3% Liquid Alternatives and Gold.

Outlook

Investor sentiment continues to remain extraordinarily strong, with risk assets continuing to power to new highs. As we enter the final quarter of the year our thinking is mixed: balanced between strong investor sentiment and the potential boom of interest rate cuts; offset by high valuations, slowing economies and persistent inflation. Our solution to this environment is a combination of quality equities, higher-coupon fixed income, and uncorrelated liquid alternatives. While not immune to market volatility, we believe this combination will provide a strong solution for our investors.
