Highlights

-November saw a significant unwind of momentum trades. Global equities were mixed, with the S&P 500 ultimately finishing the month in positive territory. U.S. Treasuries performed well as expectations for a December Fed rate cut were priced back in.

Market Review

November saw a volatile market, with risk assets selling off early before rebounding sharply at month-end. The Fed dominated sentiment, as expectations for a December rate cut swung widely. Al-bubble concerns also persisted. Global equity performance was mixed: Europe and the US ended slightly positive, though US Tech weakened on valuation worries, while EM and Japan declined amid Japan's large fiscal-stimulus announcement and rising JGB yields. US Treasuries rallied as a December cut was repriced, and K. Hassett emerged as a dovish Fed Chair candidate. Credit spreads widened slightly, gold rose, and the USD weakened broadly except against the yen.

Fund Review

The fund generated a small positive return in November, driven primarily by its bond allocations, while equities were broadly neutral. U.S. equities detracted slightly, though stock selection and the S&P 500 Equally Weighted exposure helped cushion the downside, followed by Emerging-Market and Japanese equities. Other regional exposures contributed modestly to performance. Bond allocation remained the main driver, supported by falling interest rates and only marginal widening in credit spreads. Diversification strategies added further value, helped by strong gains in gold. During the month, the manager took profits on the iShares MSCI Asia position to reduce IT exposure within the Asia allocation. Proceeds were reinvested into the Invesco Emerging Market Equity Fund, which has performed well since early November and carries a lower IT weighting.

Outlook

Looking to 2026, the Manager anticipates growth will become more widespread across sectors and while Europe will recover. The Fixed Income market presents an appealing setup, offering opportunities to benefit from yield carry without taking on excessive risks related to interest rate fluctuations or credit quality. Uncertainties on the inflation outlook and Fed's policy are balanced by downside risks to growth. Until there is greater clarity on inflation dynamics, economic growth trajectories, and fiscal policy direction, patience and selectivity remain key
