Investment objective

The objective of this Fund is to provide investors with an absolute return which has limited correlation with the trend of the main stocks or bonds markets indices by investing mainly in UCITS, UCITS eligible exchange traded funds, money market funds and/or other UCIs. The weighting between these instruments will be determined by the Manager according to its personal assessment of the market trends. The Fund may provide indirect exposure across asset classes, mainly to equities and fixed income markets but also to currencies and money market instruments globally, including emerging markets. The Fund may also be exposed to commodities, including gold and precious metals. This exposure shall only be achieved by means of eligible instruments and shall be limited to a maximum of 10% of the Fund's net assets. To allocate the exposure on the various categories of asset classes and build up a global conservative portfolio, the Manager uses, in particular, macro-economic cycle analysis, asset valuation and risk and correlation analysis. Fundamental top-down analysis will evolve through time. It may include paying attention to, without being limited to, global yield curves, markets valuations, profits cycle analysis, earnings expectations, credit spreads, investor sentiment and other factors. The Fund is subject to ongoing monitoring to ensure that risk parameters and market exposures consistent with investment views are maintained. The Fund may also invest in exchange traded financial derivative instruments (including options and futures) in order to manage its portfolio efficiently and to protect its assets and liabilities. **The Fund is actively managed not in reference to a benchmark.**

Fund manager Comment

Highlights

- The 'I' USD share class of the fund was up 1.9% in USD terms in February, with positive returns from all underlying holdings. • Strong sentiment and key positions in alternative assets such as managed futures and gold has contributed to the fund's 4.4% YTD return. • The American and Israeli attacks on Iran and subsequent spike in oil prices the beginning of March has provided a test to the market's strong sentiment, however it is our belief that underlying market fundamentals remain strong.

Market Review

• U.S. Equities (S&P 500 TR) fell 0.8%, dragged down by underperformance of the mega-cap tech names as rotation continued from growth (Russell 1000 Growth TR +3.4%) to value (Russell 1000 Value TR +2.6%). Global equities (MSCI ACWI NTR USD +1.3%), outpaced their US counterparts, with returns in Emerging Markets (MSCI Emerging NTR USD +5.5%) notably outperforming developed markets. • Fixed Income markets were largely positive in February. The Bloomberg U.S. Aggregate Bond Index was up 1.6% and Global Aggregate Bond Index Hedged to USD was up 1.1%. High Yield bonds trailed their investment grade counterparts as spreads widened, with the ICE BofA Global High Yield Constrained Index returning 0.1%. • The stand-out performers were again alternative assets; Gold was up 7.7% in February and Managed Futures again posted strong results with the SG CTA Index up 3.4%.

Fund Review

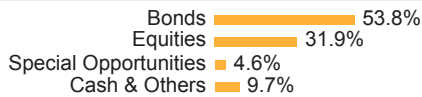

• The 'I' USD share class of the fund was up 1.9% in USD terms in February, with positive returns from all underlying holdings. • Equity markets continued their positive run, with all of our underlying managers producing positive returns. Our strongest results were from our Emerging Markets ex China holdings (+9.5%), followed by our value style Global equity manager Scharf in the iMGP Global Concentrated Equity fund (+6.0%). • Fixed income returns were all positive in February with returns clustered between flat and 0.6%. Our strongest results were from our largest single portfolio holding the iMGP US Core Plus fund (+0.6%), closely followed by our European High Yield holdings +0.55%. • Our positions in managed futures also continued to add to portfolio returns, finishing up 7.4%. Our Gold holdings slowed their ascent, however continued to produce good returns, up 4.7%.

Outlook

With the strong start to the year, we remain optimistic that broadening global earnings and a rotation in market leadership away from just mega-cap technology companies will continue to drive risk assets higher despite high valuations. With this expectation we sold out position in large cap growth technology this month. The American and Israeli attacks on Iran and subsequent spike in oil prices the beginning of March has provided a test to the market's strong sentiment, however it is our belief that underlying market fundamentals remain strong. We continue to hold a combination of quality equities, higher-coupon fixed income, and uncorrelated liquid alternatives. While not immune to market volatility, we believe this portfolio mix will provide a strong solution for our investors.
