What is this Product ?

Type

The Fund is a sub-fund of iMGP, a public limited liability company (société anonyme), incorporated as a "société d'investissement à capital variable" under the Luxembourg law of 17 December 2010 relating to undertakings for collective investment and qualifying as a UCITS. The product offered to you is a Share Class of the Fund.

Term

The Fund has no maturity date. It has been established for an unlimited duration and the PRIIP Manufacturer is not entitled to terminate it unilaterally. The Fund and the Share Class may be terminated early and liquidated in those cases set out in the prospectus and the articles of incorporation of the Company.

Objectives

The objective of this Fund is to provide its investors with long-term capital appreciation by implementing a UCITS compliant strategy that seeks to approximate the returns that alternative funds using "managed futures style" (the "Managed Futures Alternative Funds") would typically achieve. This comprises strategies that aim at generating returns by taking long and short positions across asset classes, (equities indices, government bonds or rates, currencies and/or commodities via eligible instruments) and by using futures and forward contracts to achieve their investment objectives.

For the avoidance of doubt, the Sub-Manager will not invest in such alternative funds.

The Fund seeks to achieve its objective by: (i) investing its assets in financial derivative instruments pursuant to a managed futures strategy; (ii) allocating up to 20% of its total assets in structured financial products ("SFI") to gain exposure to certain commodities; and (iii) investing directly in selected debt instruments for cash management and other purposes.

The Fund is actively managed not in reference to a benchmark.

The Fund managed futures strategy employs long and short positions in derivatives, primarily futures contracts, across the broad asset classes of equities, fixed income, currencies and, through SFI, commodities.

Fund positions in those contracts are determined based on a proprietary, quantitative model, the Dynamic Beta Engine, that seeks to identify the main drivers of performance by approximating the current asset allocation of a selected pool of the largest Managed Futures Alternative Funds.

The Fund may be indirectly exposed to the performance of commodities, mainly to gold and crude oil. To achieve this exposure, the Fund shall invest in eligible instruments (namely SFI) to a maximum of 20% of its net assets.

The Fund shall not invest more than 10% of its net assets in units of UCITS and/or other UCIs.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities as per the Taxonomy Regulation.

This class will distribute an annual dividend. Its amount and how it will be distributed will be determined by the Board of Directors. Investors attention is drawn to the fact that dividends may be paid from capital or net assets.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money in less than 5 years.

The share class is denominated in another currency than the base of the Fund. The exchange rate risk of this class is hedged against the base currency of the Fund. However, full hedging cannot be guaranteed.

Intended retail investor

This Fund is aimed more particularly at investors who wish to achieve long term capital growth, wish to invest in particular through the financial derivative instruments market, who are capable of evaluating the merits and risks of such an investment, who are able to bear the loss of their entire investment and who have an investment horizon of at least 5 years.

This Share Class may be subscribed by any type of investor. Investors are advised to invest only a part of their assets in such a Fund.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

We may share costs with the person selling the Fund to you in order to cover the services they provide to you. If so, this person will inform you of the amount.
