What is this Product ?

Type

The Fund is a sub-fund of iMGP, a public limited liability company (société anonyme), incorporated as a "société d'investissement à capital variable" under the Luxembourg law of 17 December 2010 relating to undertakings for collective investment and qualifying as a UCITS. The product offered to you is a Share Class of the Fund.

Term

The Fund has no maturity date. It has been established for an unlimited duration and the PRIIP Manufacturer is not entitled to terminate it unilaterally. The Fund and the Share Class may be terminated early and liquidated in those cases set out in the prospectus and the articles of incorporation of the Company.

Objectives

The objective of this Fund is to provide its investors with long term capital growth, principally by means of investments at all times for at least 75% of the Fund's assets in equities or similar instruments issued by companies based in a member state of the European Monetary Union (EMU). It can also be exposed up to 10% to equities issued by companies having their registered office in other European countries, or having a predominant proportion of their assets or interests in Europe, or operating predominantly in or from this geographical area.

The Fund promotes environmental and social characteristics according to article 8 of the Regulation (EU) 2019/2088 but does not have sustainable investment as its objective.

The Sub-Manager believes that Environmental, Social and Governance (ESG) consideration allows for long-term value creation, allowing to foster a positive change. The Management Company has adopted for this purpose an ESG policy which may be consulted on www.imgp.com.

More information on the environmental and/or social characteristics promoted by the Fund may be found on Appendix B to the Prospectus.

The MSCI EMU Net Return Index is used, in the appropriate currency of a given Share Class of the Fund, for comparison only, including for performance comparison. The Fund is actively managed and the Sub-Manager's discretionary powers are not constrained by the index. Although the Sub-Manager may take into consideration the index composition, the Fund may bear little resemblance to the index.

In order to achieve its investment objective, the Fund will base its investments on fundamental research in the selection of individual securities for long positions. The allocation will be reviewed frequently in light of discussions the Sub-Manager may have with the management of companies in which it invests or is considering for investment. The policy of the Fund is to maintain a portfolio of equities across a range of Eurozone countries and sectors, subject to the investment restrictions set out in this Prospectus.

The Fund shall not invest more than:

- 10% of its net assets in units of UCITS and/or other UCIs
- 10% of its net assets in REITs
- 50% of its net assets in shares of small and medium companies.

The Fund may also invest in derivative financial instruments in order to manage its portfolio efficiently and to protect its assets and liabilities.

The Fund is eligible for the PEA.

The Fund is also eligible for the partial tax exemption under GITA; to that purpose, it complies with the specific investment restrictions described in Section 13.

In order to enhance its overall performance, the Fund participates, on a continuous basis unless otherwise decided by the Management Company, in Securities Lending operations for an expected proportion of 0% to 30% of its assets, subject to a maximum of 40%.

Profits are not distributed but are accumulated by the Fund.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money in less than 5 years.

This Fund is aimed more particularly at investors who wish to benefit from long term capital growth, who are interested in investments with predominant proportion of their assets or interests in Europe, or operating predominantly in or from this geographical area, who are capable of evaluating the merits and risks of such an investment, who are able to bear the loss of their entire investment and who have an investment horizon of at least 5 years.

What are the costs ?

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Fund performs as shown in the moderate scenario ;
- GBP 10,000 is invested

Investment GBP 10,000	If you exit after 1 year	If you exit after 5 years (recommended holding period)

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 7.26% before costs and 6.44% after costs.

We may share costs with the person selling the Product to you in order to cover the services they provide to you. If so, this person will inform you of the amount.
