Global Risk-Balanced Fund (the "Fund"), Share class : I GBP (LU2428014661) is a sub-fund of iMGP (the "SICAV") managed by iM Global Partner Asset Management S.A. (the "Management Company")

Objectives and investment policy

The Sub-fund aims to provide long-term capital growth by being exposed to a wide range of asset classes around the world and by offering a balanced and flexible exposure to equity and fixed income markets by investing in UCITS such as ETFs and Other UCIs.

A composite index made of 50% Bloomberg World Large & Mid Cap Net Return Index, 45 % Bloomberg US Aggregate Bond Index and 5% Bloomberg 1-3 month US T-Bill Index is used, in the appropriate currency of a given Share Class of the Sub-fund, for comparison only, including for performance comparison. The Sub-fund is actively managed and, the Sub-Manager's discretionary powers are not constrained by the index. Therefore, although the Sub-Manager may take into consideration the index composition, the Sub-fund may bear little resemblance to the index. The Sub-fund will invest globally, mainly through ETFs and other UCIs, in equities, fixed-income instruments (such as bonds, notes and convertible bonds, including, high yield, subordinated and inflation-linked bonds) and money market instruments. Equity investments may account, directly and/or indirectly, down to a minimum of 25% and up to a maximum of 75%. Fixed income investments may account, directly and/or indirectly, down to a minimum of 20% and up to a maximum of 70%. Money market investments and time deposits may account, directly and/or indirectly, up to a maximum of 30% of the Sub-fund's net assets.

The Sub-fund may be exposed to commodities, including gold and precious metals. This exposure shall only be achieved by means of eligible instruments and shall be limited to a maximum of 30% of the Sub-fund's net assets.

The Sub-Manager employs a top-down, fundamental research process that aims identifying which various global market particular segments to highlight and to reduce at different times. It may integrate material environmental, social, and governance (ESG) factors as part of an evaluation of an investment vehicle's financial risks.

To allocate the exposure on the various categories of asset classes and build up a global risk balanced portfolio, the Sub-manager uses, in particular, macro-economic cycle analysis, capital scarcity and risk analysis.

Fundamental top down analysis will evolve through time. It may include paying attention to, without being limited to: global yield curves, markets valuations, profits cycle analysis, earnings expectations, credit spreads, investor sentiment and other factors. The Sub-fund is actively managed and subject to ongoing monitoring to ensure that risk parameters and market exposures consistent with investment views are maintained.

The manager may use techniques to partially or fully protect the Sub-fund from its exposure to currencies other than the base currency. You may sell your shares in the Sub-fund upon request, on a daily basis.

Profits are not distributed but are accumulated by the Sub-fund.

Recommendation: this Sub-fund may not be appropriate for investors who plan to withdraw their money in less than 5 to 7 years.

Risk and reward profile

The Synthetic Risk & Reward Indicator (SRRI) is assigned due to the past or expected share class price variations resulting from its currency and the nature of the Fund's investments and strategy.

The SRRI is based on historical data and may not be a valid indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time.

The lowest risk category is not assimilated to a risk-free investment.

The Fund does not offer capital guarantee or asset protection measures.

The Fund may be exposed to the following risks which are not satisfactorily captured by the SRRI and may negatively impact its assets:

Operational risk: Human or technical issues or errors during the processing of the transactions and/or the calculation of the NAV of the Fund may result in losses.

Liquidity risk: selling securities in low volume markets may imply a negative impact on the valuation which result in losses.

Financial Derivatives risk: Derivative transactions generate leverage which may emphasize losses whether the strategy (such as hedging, exposure, efficient portfolio management) does not react as expected under certain market conditions.

Counterparty risk: When a counterparty does not respect its obligation related to contracts such as term deposits or over-the-counter derivatives losses may occur.

Credit risk: When issuers default on their payment obligations, unexpected losses may occur on any type of assets linked to them.

Emerging Markets risk: Emerging markets investments valuation are more sensitive to risks not linked with the investment itself; such as among others, instability in the political, fiscal and legal environments, but also fraud. Unintended loss may occur due to such factors.

For further information about the risks associated to this Fund, please see the full prospectus, available at the head office of the SICAV.
