

Key Investor Information Document

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

DBi Managed Futures Fund (the "Fund"), Share class : I M GBP D HP (LU2646068531) is a sub-fund of iMGP (the "SICAV") managed by iM Global Partner Asset Management S.A. (the "Management Company")

Objectives and investment policy

The objective of this Sub-fund is to provide its investors with long-term capital appreciation by implementing a UCITS compliant strategy that seeks to approximate the returns that alternative funds using "managed futures style" (the "Managed Futures Alternative Funds") would typically achieve. This comprises strategies that aim at generating returns by taking long and short positions across asset classes, (equities indices, government bonds or rates, currencies and/or commodities via eligible instruments) and by using futures and forward contracts to achieve their investment objectives.

For the avoidance of doubt, the Sub-Manager will not invest in such alternative funds.

The Sub-Fund seeks to achieve its objective by: (i) investing its assets in financial derivative instruments pursuant to a managed futures strategy; (ii) allocating up to 20% of its total assets in structured financial products ("SFI") to gain exposure to certain commodities; and (iii) investing directly in selected debt instruments for cash management and other purposes.

The Sub-fund is actively managed not in reference to a benchmark.

The Sub-fund's managed futures strategy employs long and short positions in derivatives, primarily futures contracts, across the broad asset classes of equities, fixed income, currencies and, through SFI, commodities.

Fund positions in those contracts are determined based on a proprietary, quantitative model, the Dynamic Beta Engine, that seeks to identify the main drivers of performance by approximating the current asset allocation of a selected pool of the largest Managed Futures Alternative Funds.

The Sub-fund may be indirectly exposed to the performance of commodities, mainly to gold and crude oil. To achieve this exposure, the sub-fund shall invest in eligible instruments (namely SFI) to a maximum of 20% of its net assets.

The Sub-fund shall not invest more than 10% of its net assets in units of UCITS and/or other UCIs.

The investments underlying this Sub-fund do not take into account the EU criteria for environmentally sustainable economic activities as per the Taxonomy Regulation.

You may sell your shares in the Sub-fund upon request, on a daily basis.

This class will distribute an annual dividend. Its amount and how it will be distributed will be determined by the Board of Directors. Investors attention is drawn to the fact that dividends may be paid from capital or net assets.

Recommendation: this Sub-fund may not be appropriate for investors who plan to withdraw their money in less than 5 years.

The share class is denominated in another currency than the base of the Fund. The exchange rate risk of this class is hedged against the base currency of the Fund. However, full hedging cannot be guaranteed.

Risk and reward profile

The Synthetic Risk & Reward Indicator (SRRI) is assigned due to the past or expected share class price variations resulting from its currency and the nature of the Fund's investments and strategy.

The SRRI is based on historical data and may not be a valid indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time.

The lowest risk category is not assimilated to a risk-free investment.

The Fund does not offer capital guarantee or asset protection measures.

The Fund may be exposed to the following risks which are not satisfactorily captured by the SRRI and may negatively impact its assets:

Operational risk: Human or technical issues or errors during the processing of the transactions and/or the calculation of the NAV of the Fund may result in losses.

Liquidity risk: selling securities in low volume markets may imply a negative impact on the valuation which result in losses.

Financial Derivatives risk: Derivative transactions generate leverage which may emphasize losses whether the strategy (such as hedging, exposure, efficient portfolio management) does not react as expected under certain market conditions.

Counterparty risk: When a counterparty does not respect its obligation related to contracts such as term deposits or over-the-counter derivatives losses may occur.

Credit risk: When issuers default on their payment obligations, unexpected losses may occur on any type of assets linked to them.

For further information about the risks associated to this Fund, please see the full prospectus, available at the head office of the SICAV.

Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
The percentage shown is the maximum amount that can be paid out of your investment. Your financial advisor or distributor can inform you of the associated entry and exit charges.	
Charges taken from the Fund over a year	
Ongoing charges	0.75%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower.

The ongoing charges figure is based on expenses for the year ending 31 December 2024. This percentage may vary from year to year. It excludes performance fee and transaction costs, except in the case of an entry/exit charge paid by the Fund when buying/selling units in another collective investment.
