

Key Investor Information Document

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Japan Opportunities Fund (the "Fund"), Share class : C EUR HP (LU0204988207) is a sub-fund of iMGP (the "SICAV") managed by iM Global Partner Asset Management S.A. (the "Management Company")

Objectives and investment policy

The objective of this Sub-fund is to provide its investors with capital growth; at least two thirds of the Sub-fund's assets are invested at all times in equities and other similar instruments issued by companies having their registered office in Japan. The Sub-fund may purchase securities traded on the regulated markets listed in section 13 "Investment restrictions" and in particular on the Jasdaq.

The Sub-fund promotes environmental and social characteristics according to the article 8 of SFDR but does not have sustainable investment as its objective.

The Sub-Manager believes that Environmental, Social and Governance (ESG) consideration allows for long-term value creation, allowing to foster a positive change. The Management Company has adopted for this purpose an ESG policy which may be consulted on www.imgp.com.

For the purpose of attaining ESG characteristics promoted by the Subfund, the portfolio seeks to achieve an ESG score higher than the ESG score of the index, as measured by the Sub-Manager methodology, as well as to achieve a carbon intensity lower than that of its index.

The TOPIX Net TR index is used, in the appropriate currency of a given Share Class of the Sub-fund, for comparison mainly, including for performance comparison. Although the Sub-fund is actively managed and the Sub-Manager is not limited to investing in accordance with the composition of the index, the Sub-fund may be constrained by certain risk indicators or restrictions that refer to the index.

Information on such constrains can be obtained from the Management Company at all times.

The index is a broad market weighted index which is not aligned with the environmental and social characteristics promoted by the sub-fund.

The Sub-fund shall not invest more than 10% of its net assets in units of UCITS and/or other UCIs or 10% of its net assets in REITs.

The Sub-fund may also invest in derivative financial instruments in order to manage its portfolio efficiently and to protect its assets and liabilities.

The Sub-fund is eligible for the partial tax exemption under GITA; to that purpose, it complies with specific investment restrictions described in Section 13 of the prospectus.

The manager may use techniques to partially or fully protect the Sub-fund from its exposure to currencies other than the base currency.

You may sell your shares in the Sub-fund upon request, on a daily basis.

Profits are not distributed but are accumulated by the Sub-fund.

Recommendation: this Sub-fund may not be appropriate for investors who plan to withdraw their money in less than 5 years.

The share class is denominated in another currency than the base currency of the Sub-fund. The exchange rate risk of this class is hedged against the base currency of the Sub-fund. However, full hedging cannot be guaranteed.

Risk and reward profile

The Synthetic Risk & Reward Indicator (SRRI) is assigned due to the past or expected share class price variations resulting from its currency and the nature of the Fund's investments and strategy.

The SRRI is based on historical data and may not be a valid indication for the future risk profile of the Share Class. It is not a target or a guarantee and may change over time.

The lowest risk category is not assimilated to a risk-free investment.

The Fund does not offer capital guarantee or asset protection measures.

The Fund may be exposed to the following risks which are not satisfactorily captured by the SRRI and may negatively impact its assets:

Operational risk: Human or technical issues or errors during the processing of the transactions and/or the calculation of the NAV of the Fund may result in losses.

Liquidity risk: selling securities in low volume markets may imply a negative impact on the valuation which result in losses.

Financial Derivatives risk: Derivative transactions generate leverage which may emphasize losses whether the strategy (such as hedging, exposure, efficient portfolio management) does not react as expected under certain market conditions.

Counterparty risk: When a counterparty does not respect its obligation related to contracts such as term deposits or over-the-counter derivatives losses may occur.

For further information about the risks associated to this Fund, please see the full prospectus, available at the head office of the SICAV.
