The financial statements have been presented on the basis of the Net Asset Value of 30 June 2024 calculated on 28 June 2024.

2.2 - Portfolio valuation

Transferable securities admitted to an official Exchange listing or traded on another regulated market are valued on the basis of the last available price in Luxembourg on the valuation day. If these securities are traded on several markets, the main market's last available price will be applied. Transferable securities not admitted to an official Exchange listing or not traded on another regulated market, and transferable securities admitted to official Exchange listing or traded on another regulated market, for which the last known price is not representative, are valued based on a prudent, good faith estimate of the probable sale value by the Board of Directors.

2.3 - Net realised profits or losses on sales of investments

Realised profits or losses on the sale of investments for each sub-fund are calculated on the basis of the average cost of the investments sold.

2.4 - Foreign currency translation

Bank assets, other net assets and the valuation of investments expressed in currencies other than that of the sub-fund are converted into that currency at the exchange rate in force at 30 June 2024.

2.9 - Valuation of Contracts for Difference ("CFD")

CFD are valued at fair value based respectively on the last known spread curve, rates curve and last known closing price of the underlying asset. A "contract for difference" (CFD) is a contract executed between two parties to exchange, upon closure of the contract, the difference between the opening and closing price of the underlying share multiplied by the number of shares specified in the contract.

2.10 - Valuation of swaps

Credit Default Swaps, Interest Rate Swaps are valued at fair value based respectively on the last known spread curve, rates curve and last known closing price of the underlying asset.

Upon termination of a loan, the relevant sub-fund is required to return to the borrower the posted collateral. Loans are subject to termination by the relevant sub-fund or the borrower at any time.

Securities lending income is recognized on a cash basis and recorded in the statement of operations and changes in net assets under the heading "Securities lending income".

2.13 - Distribution of costs and expenses

Expenses and costs attributable to a particular share class and/or a particular sub-fund will be allocated directly. Other expenses and costs not directly attributable to a particular share class and/or a particular sub-fund will be allocated equally to the various classes within the various sub-funds and/or to the various sub-funds.

If the amount of expenses and costs so requires, they will be allocated to the share classes and/or sub-funds on a pro-rata basis in terms of their respective net assets.

2.14 - Transaction fees

For the period ending 30 June 2024, the sub-funds sustained transaction costs (brokerage costs) in connection with the sale or purchase of transferable securities, money market instruments, derivatives or other eligible assets. 10 - Swing pricing

The Management Company has implemented a protection mechanism intended to avoid performance dilution, with a trigger threshold, in order to protect the interests of Sub-funds' shareholders. Such protection mechanism is applicable to all the Sub-funds of the Fund.

The actual cost of purchasing or selling assets and investments for a given Sub-fund may deviate from the latest available price, as appropriate, in calculating its Net Asset Value due to liabilities from buying and selling prices of the underlying investments. These costs have an adverse effect on a Sub-fund value and are known as "dilution". Indeed, when there are significant subscriptions to or redemptions from the Sub-fund, the relevant Sub-manager must invest/disinvest the corresponding amounts, thus generating large transactions which may entail variable transaction charges depending on the asset types concerned. These charges are mainly taxes on certain markets and execution fees billed by brokers. They can be fixed amounts or variable in proportion to the volumes traded and/or take the form of the difference between the bid or ask prices for a financial instrument on the one hand and the valuation price on the other.

To mitigate the effects of dilution, the Board of Directors may, at its discretion, make a dilution adjustment to the Net Asset Value. The goal of the anti-dilution mechanism, also known as "swing pricing", is therefore to have these charges borne by the investors at the origin of the subscription/redemption transactions concerned and to protect other existing investors. As a general rule, the requirement to make a dilution adjustment will depend upon the volume of subscriptions or redemptions of Shares in the relevant Sub-fund. The Board of Directors may make a dilution adjustment if, in its opinion, the existing Shareholders (in case of subscriptions) or remaining Shareholders (in case of redemptions) might otherwise be adversely affected.

The Board of Directors has entrusted the Management Company with the implementation and execution of the anti-dilution mechanism. In practice, on a Net Asset Value calculation day, if the net amount of subscription and redemption orders from investors across all Share Classes of a Subfund exceeds a threshold that the Management Company has predetermined, expressed as a percentage of the Sub-fund's net assets (called the "trigger threshold"), the Net Asset Value may be adjusted upwards or downwards to take into account the readjustment costs attributable to the net subscription/redemption orders. In particular, the Net Asset Value of the relevant Sub-fund will be adjusted (upwards or downwards) to reflect the estimated bid/ask spread of the assets in which the Sub-fund invests, the estimated fiscal charges and/or dealing costs that the Sub-fund may incur.

In the case of net subscriptions, there could be an increase in the Net Asset Value, i.e. an increase in the purchase price for all investors subscribing or redeeming Shares on that Transaction Date.

In case of net redemptions, there could be a reduction in the Net Asset Value, i.e. a reduction in the selling price for all investors redeeming or subscribing Shares on that Transaction Date.

The Net Asset Value of each Share Class in the Sub-fund will be calculated separately. Still, any dilution adjustment will, in percentage terms, affect the Net Asset Value of each Share Class in an identical manner. The scope of this variation depends on the estimate made by the Management Company of the transaction charges applied to the types of assets concerned. The adjusted Net Asset Value is the only Net Asset Value communicated to Sub-funds' shareholders. In case of performance fees, these fees are calculated before applying the antidiilution mechanism, making these fees immune to the impact of swing pricing. By the regulations, the Management Company does not notify shareholders of the trigger threshold and ensures that internal information channels are restricted to preserve the confidential nature of the information.

As this adjustment is linked to the net amount of the Sub-fund's subscription and redemption orders, it is not possible to predict with accuracy whether swing pricing will be applied at any given moment in the future or the frequency with which the Management Company will make such adjustments. The pricing adjustment will not exceed 2.5% of the Net Asset Value, except in exceptional circumstances, such as in the event of a substantial drop in liquidity. If this 2.5% limit is exceeded, the Management Company will inform the CSSF and advise shareholders by publishing the information on the Website.
